

Saskatchewan Onsite Wastewater
Management Association

Hi SOWMA Members,

Thank you for continuing to support the Saskatchewan Onsite Wastewater Management Association.

Together, we continue promoting our industry through education and providing membership support. This includes a recognized Onsite Wastewater Practitioner Program, field training workshops, newsletters, and our website.

As a member of the Aquifer & Anderson Pump House team, we are involved with many associations. The SOWMA provide support to our Contractors and Vendors, plus promote this industry better than most associations. We also lean on SOWMA to help us educate Homeowners on the importance of properly designed wastewater systems.

We are forecasting continued challenges in the upcoming year, still because of COVID-19 and inventory shortages. Also Saskatchewan Health Inspectors are being pulled in many directions, trying to meet the demands of our Health Care system.

I still believe the SOWMA is the best choice for educating Inspectors, Contractors, Vendors & Homeowners, regarding the importance of new installations which satisfy the provincial guidelines, and to make sure the approval requirements of the design applications are consistent throughout Saskatchewan.

Your membership does make a difference.
Again, thank you for your support.

Sincerely,

A handwritten signature in black ink that reads "Travis Wolfe". The signature is fluid and cursive.

Travis Wolfe
President
